Bill: S. 2485

RE: Proposed U.S. Senate legislation
to temporarily suspend Import tariffs on
certain tire making machinery – molds

To:

Mr. Fravel, International Trade Commissioners, & United States Congress;

I oppose Bill S. 2485, please stop this bill from passing.

Quality Mold Inc., as well as other mold shops, are fully capable of producing all the molds that are imported from over seas. In the year 2000, there were over 10,000 employees working in our industry. Today, there is a maximum of 3,000. Twenty-three tire mold facilities and related businesses have shut their doors since the year 2000, and most of these people are still looking for work today. May 21, 2002; we assembled together in Washington DC and we knew then, the position we would be in today. No one did, or has done anything about the situation.

Please look up Investigation Number:

332-435

USITC Publication 3556

Dated: October 2002

There is a Job Summit in Washington DC this week, and we all know the answer... Stop sending our jobs overseas! We work harder, we produce more, and we have nothing. Every dollar worth of product that China sends to the United States, the Chinese government gives \$0.15 to the Chinese manufacturer. We must charge China at least a 15% tariff in order for them to import product in to our country.

They are growing... we are shrinking...

They are building... we are demolishing...

We borrow money from them, the same money we send to them, to build things for us...

I have 220 people left (from 500) working for me. Please allow me to keep them employed so they are able to feed their families.

From the CEO of Quality Mold, who cares about America and the American people.

Again, I oppose Bill: S. 2485.

Best Regards,

Steve Zoumberakis
