**B. Purpose of the Limited Tariff Benefit:**

(5E)-5-[(4-chlorophenyl)methylene]-2,2-dimethyl-1-(1H-1,2,4-triazol-1-ylmethyl)cyclopentanol is an imported technical active ingredient used in the treatment of agronomic important seeds in the United States and in selected export markets. The technical active ingredient is used alone and in mixtures with other active ingredients in the treatment for preservation and protection of a variety of seed against fungal and insect attack after planting. Suspension of the duty on this product will enable BASF to be more price-competitive in and offer an additional selection of seed treatment options to the farmers, nursery and home and commercial turf markets in the United States as well as in certain foreign markets

**C. Financial Benefit Certification**

I hereby certify that neither I nor my immediate family has a financial interest in the above described limited tariff benefit.
