

9032 individuals listing affiliation with the National Wildlife Federation submitted the following:

Dear Sen. Baucus,

As a taxpayer, and as a supporter of the true purpose of the alternative-fuels tax credit, I strongly oppose use of the credit by paper mill companies to burn diesel fuel along with black liquor. The exploitation of this loophole costs taxpayers billions of dollars and emits harmful carbon pollution into our atmosphere. I fully support the draft legislation put forward to close this loophole and consider it critical that Congress take swift action.

Thank you for your immediate attention to this issue.
