Improving Patient Safety

Safety Situation

The goal of the Improving Patient Safety system is to collect information about safety related incidents occurring system-wide, in order to increase organ utilization and decrease the morbidity and mortality of transplant patients.

What is a Safety Situation?

A situation or activity that affected or could have affected patient safety.

What to report:

- Any patient safety situation
- Any other situation that causes a safety concern from a transplantation, donation, and/or quality perspective.

Please report such situations in a timely manner.

Below you will find the most current information for situation [REDACTED]. You can complete the following tasks on this page:

- Access a printer-friendly version of this safety situation
- Add resolution information

Did this safety situation cause or contribute to:

The non-recovery of organ(s)? * Unknown

The discard of any organ(s)? * Unknown

A delay (prolonged ischemic time) for any organ(s) transplanted? * Unknown

☐ Other (please describe in the description field below)

Date Event Occurred: * 11/27/2018

Detailed Description of the Event: * VUMC accepted donor organ AFKY198 for our recipient. All OPO and DonorNet data stated this donor was ABO O, which was compatible with our recipient. After transplantation occurred, we were notified that the donor's ABO was actually A, making the donor incompatible with our recipient. We are now following our own ABO incompatible protocol in an attempt to manage this recipient and organ.

Has a root cause analysis (RCA) been completed? *

☐ Yes ☒ No ☐ In Progress

Please specify additional details regarding the RCA:

We were just made aware of this event this morning; no RCA has been able to be completed yet.
