

To whom it may concern :

Who placed us in financial servitude?.

The majority of Puerto Ricans know who.

They understand that this macroeconomical disadjustment was a cumulative legacy of bon vivant rulers who misused our government's borrowed money.

Every single dollar owed to our creditors is here in the island just follow the money.

Governors between Rafael Hernandez Colon first term, and the actual incumbent borrowed billions of dollars, to sustain their lavish lifestyles, to satisfy the island's family owned oligarchies, to plugg in budget deficits, and to cover all sorts of operational expenses.

The people of Puerto Rico know that after three dacades of corruption, bankers, political leaders, and oligharcs are in urgent need of rehabilitation.

It will be just for our people, if they all could face the federal justice system.

The untouchable personality of our so called ruling class is deeply rooted in their cultural entitlement stronghold.

They don't think of themselves, as responsible for their actions.

Nonetheless, in order to repay the debt, they need to return everything they took for themselves, or face a confiscating authority that will expropriate their illegally obtained assets.

Otherwise our so called "natural way" out of this macroeconomical disadjustment, will be a painful process, of at least two decades of unemployment, bankruptcy and starvation.

If there is a visible, honest law enforcement initiative, that will equally prosecute all financial executives, bipartisan government officials, and local oligarchs, it will bring justice and hope to our people.

By cleansing this status quo failed leadership, a new one would emerge, and will act creatively to repay the debt.

If there is anything that I can do to help please let me be of service.

Sincerely,

Carlos

Sumpter
