13          a payment code for a visit for longitudinal comprehensive  
14          care planning services. Such study shall include an anal-  
15          ysis of the following to the extent such information is  
16          available:

17               (1) The frequency with which services similar to  
18               longitudinal comprehensive care planning services  
19               are furnished to Medicare beneficiaries, which pro-  
20               viders of services and suppliers are furnishing those  
21               services, whether Medicare reimbursement is being  
22               received for those services, and, if so, through which  
23               codes those services are being reimbursed.

24               (2) Whether, and the extent to which, longitu-  
25               dinal comprehensive care planning services would

1 overlap, and could therefore result in duplicative  
2 payment, with services covered under the hospice  
3 benefit as well as the chronic care management code,  
4 evaluation and management codes, or other codes  
5 that already exist under part B of the Medicare pro-  
6 gram.

7 (3) Any barriers to hospitals, skilled nursing fa-  
8 cilities, hospice programs, home health agencies, and  
9 other applicable providers working with a Medicare  
10 beneficiary to engage in the care planning process  
11 and complete the necessary documentation to sup-  
12 port the treatment and care plan of the beneficiary  
13 and provide such documentation to other providers  
14 and the beneficiary or his representative.

15 (4) Any barriers to providers, other than the  
16 provider furnishing longitudinal comprehensive care  
17 planning services, accessing the care plan and asso-  
18 ciated documentation for use related to the care of  
19 the Medicare beneficiary.

20 (5) Potential options for ensuring that applica-  
21 ble providers are notified of a patient's existing lon-  
22 gitudinal care plan and that applicable providers  
23 consider that plan in making their treatment deci-  
24 sions, and what the challenges might be in imple-  
25 menting such options.

1           (6) Stakeholder’s views on the need for the de-  
2           velopment of quality metrics with respect to longitu-  
3           dinal comprehensive care planning services, such as  
4           measures related to—

5                   (A) the process of eliciting input from the  
6                   Medicare beneficiary or from a legally author-  
7                   ized representative and documenting in the  
8                   medical record the patient-directed care plan;

9                   (B) the effectiveness and patient-  
10                  centeredness of the care plan in organizing de-  
11                  livery of services consistent with the plan;

12                  (C) the availability of the care plan and as-  
13                  sociated documentation to other providers that  
14                  care for the beneficiary; and

15                  (D) the extent to which the beneficiary re-  
16                  ceived services and support that is free from  
17                  discrimination based on advanced age, disability  
18                  status, or advanced illness.

19           (7) Stakeholder’s views on how such quality  
20           metrics would provide information on—

21                   (A) the goals, values, and preferences of  
22                   the beneficiary;

23                   (B) the documentation of the care plan;

24                   (C) services furnished to the beneficiary;

25                   and

1 (D) outcomes of treatment.

2 (8) Stakeholder's views on—

3 (A) the type of training and education  
4 needed for applicable providers, individuals, and  
5 caregivers in order to facilitate longitudinal  
6 comprehensive care planning services;

7 (B) the types of providers of services and  
8 suppliers that should be included in the inter-  
9 disciplinary team of an applicable provider; and

10 (C) the characteristics of Medicare bene-  
11 ficiaries that would be most appropriate to re-  
12 ceive longitudinal comprehensive care planning  
13 services, such as individuals with advanced dis-  
14 ease and individuals who need assistance with  
15 multiple activities of daily living.

16 (9) Stakeholder's views on the frequency with  
17 which longitudinal comprehensive care planning  
18 services should be furnished.
