

Puerto Rico should seeks to become a County of the State of Florida. Millions of Citizens that live on the island will be able to vote for a President, gain representation in Congress, gain access to Florida's bankruptcy laws and obtain ALL the right guaranteed by the Constitution of the US, while the Union maintain its 50 state identity. Florida geographical and demographics proximity to the Island provides viable opportunities for development and progress. The current Florida government and financial structure would provide fiscal control over island politicians who are ill equipped to handle a fully Independent country or a empowered State. #floridaforpuertorico
