

Next Friday PROMESA members will meet to undertake important decisions related to our deep economic problem. Like most Puerto Ricans, I'm very grateful for the undertaking that, for our benefit, will promptly begin and hope that the expected results are attained, although they will not last long, unless the real root of our economic is not solved.

Our political history provides the evidence on how our fake democracy had worked to destroy our economy. It proves how the New Progressive Party (NPP) makes economic changes to improve our economy and how the Popular Democratic Party (PDP) stop and reverse them in order to preserve our current status and avoid statehood.

It is obvious that in order to preserve whatever progress is attained by PROMESA, our present non-incorporated territorial status shall be changed to an "INCORPORATED TERRITORIAL STATUS".

Cordially,

Jose J. Muniz
