

Sirs,

Although I did not agree with PROMESA, I recognized that the PR Government and his legislature had done poor job to reduce and contains the ELA finance.

I would like to provide some hints to improve cost control of the government and agencies included the corporations:

1. Implement on each Gov Agencies a financial report system that provide Income/ Expenses. This report should be provide quarterly.
2. Analyze and recommend a expense control plan to aum reduction per year in escalated manner , i. e. 10%,20%, 30% or greater based on corporation services.
3. Re- evaluate some PR related to buy bonus so that be a major control and justification to get more loan. In this area I recommend that any loan investment need to be approve by the PR citizens on a referendum.
4. Evaluate the Gov medical plan to ensure that the majority of money reach citizens and not reach the insurance organizations.
5. For any federal grant provide from US to ELA established an fiscal entity out of control of PR Gov to ensure that money goes directly and in totality to intended service area.
6. Recommend that US corporation that have business in PR applied an special tax return(started on 10% to 15%) that be used by improve PR Gov services, specially medical services and for children with impediments.
7. Based on our resources which have excellent technical capabilities I suggest to continue bring to our area more US and/or others Nations more Industries so that we can improve our labor force which they want is work.
8. Recommend to meet our Agriculture experts to create a plan to greatly expand agriculture in PR and able us be independent of food at least to increase it to at least 50% and if possible sell the exceed to US.
9. Evaluate Education Department expenses and ensure that the majority of the money goes directly to students and professors and not stay in the bureaucracy and department counselors. Recommend that department provide in a quarterly based financial reports so that we know where the money are used.
10. Finally if you want really to help PR be a successful nation I urge that your team encourage PR leaders to take the leadership to congregate a Constitutional meeting and agree on which political conditions we want the Congress to act upon so that we terminate this humiliated colonial regimen.

Thanks for the opportunities to read my
Feedback and I hope that you
Treat our leadership with respect and dignity.
