**NOMINATION OF SIDNEY LEWIS JONES TO BE
ASSISTANT SECRETARY OF THE TREASURY
FOR ECONOMIC POLICY**

MONDAY, OCTOBER 16, 1989

**U.S. SENATE,
COMMITTEE ON FINANCE,
Washington, DC.**

The hearing was convened, pursuant to notice, at 3:05 p.m., in room SD-215, Dirksen Senate Office Building, Hon. Lloyd Bentsen (chairman of the committee) presiding.

Also present: Senators Rockefeller, Pryor, Packwood, Danforth, Chafee, and Armstrong.

[The press release announcing the hearing follows:]

[Press Release No. H-51, October 13, 1989]

**SENATOR BENTSEN ANNOUNCES HEARING AND EXECUTIVE SESSION ON TREASURY
NOMINATION**

WASHINGTON, DC—Senator Lloyd Bentsen (D., Texas), Chairman, announced Friday that the Finance Committee will hold a hearing and executive session on a nomination for the U.S. Department of the Treasury on Monday, October 16, 1989 at 3 p.m. in Room SD-215 of the Dirksen Senate Office Building.

Dr. Sidney Lewis Jones has been nominated to be Assistant Secretary of the Treasury for Economic Policy. Dr. Jones is currently a consultant at Treasury, and has been a visiting professor at Georgetown University and on the associate faculty at the Brookings Institution.

**OPENING STATEMENT OF HON. LLOYD BENTSEN, A U.S. SENATOR
FROM TEXAS, CHAIRMAN, SENATE FINANCE COMMITTEE**

The CHAIRMAN. This hearing will come to order.

Dr. Jones, it is a Monday afternoon with no votes scheduled, but since I think that you are eminently qualified for the job, we are going to try to get this done in very short order. I had a call from the distinguished Secretary of the Treasury asking us to expedite your confirmation. As I recall, your nomination came over to us during the August recess, and we have been somewhat busy since then.

You have been nominated to be Assistant Secretary of Treasury for Economic Policy. So, you would be the Treasury chief's primary source of knowledge on international and domestic economic conditions, including the financial markets. It seems the timing is quite appropriate. You are also going to be helping the Administration work out its economic projections and explaining them to us.

You are certainly no stranger to the whole Treasury Department. As I recall, you were an Assistant Secretary for the Treasury back in 1973.

Dr. JONES. Yes, sir.

The CHAIRMAN. Unless they have changed the offices around quite a bit since you were there, you should feel right at home. In the 15 or 16 years since you were there, we have seen some very turbulent times, some major changes in economic circumstances in our country. When we experienced the dramatic drop in the stock market last Friday, we thought back to what happened 2 years ago on Black Monday. But, the circumstances were different. In 1987, the dollar was being threatened, and there was deep concern about interest rates skyrocketing and inflation getting out of control. This time, the GNP is rising at a 3-percent rate, but interest rates are unstable.

I cannot help but remember those people who bought stock immediately after the decline in 1987. As of today, most of their stocks are up 50 percent from what they paid for them. So I would surmise that quite a number of those people had anticipated that result. But, what we have seen this Monday is quite different from that Monday of 2 years ago.

Dr. Jones, I think you are eminently qualified for this job, and I am delighted to see you back. I would now defer to the ranking minority member of the committee, Senator Packwood.

Senator PACKWOOD. Mr. Chairman, I have no statement. I am delighted to get somebody of this caliber in this position.

The CHAIRMAN. So am I. Senator Chafee?

Senator CHAFEE. Mr. Chairman, I just think it is extraordinary that we have somebody of Dr. Jones' capability, who is prepared to serve our government for so many years in so many different positions. And I think it is a tribute to you.

I also see amongst your accomplishments that you were the Bentsen Lecturer in the Lyndon Johnson School of Public Affairs. I think that should do you no harm in obtaining confirmation here today. How was your lecture?

Dr. JONES. It was printed in a book, so it must have been adequate.

Senator CHAFEE. Good. Well, you simply do have an outstanding record. I am delighted, we are all delighted, that you are prepared to come back into government. What exactly have you been doing for the last few years? I have trouble following this.

Dr. JONES. I resigned as Under Secretary of Commerce in November of 1985, and I then taught at Rice University in Houston. I was on a program with Senator Bentsen a few years ago at the Rice University and in Vail, CO with him on another occasion. So our trails do cross frequently.

I then taught at Georgetown University and joined the faculty at the Brookings Institution. That is where I have been until becoming a consultant to the Treasury in May, resigning my Georgetown and Brookings positions this summer.

Senator CHAFEE. Good. Well, we feel very happy that you are going to pitch in again and help the Administration.

Dr. JONES. Thank you.

Senator CHAFEE. I want to thank you. Thank you, Mr. Chairman.

The CHAIRMAN. Thank you. Would you proceed with any statement that you want to make, Doctor? Oh, I beg your pardon, Senator Rockefeller. I did not see you. How are you?

Senator ROCKEFELLER. I have no questions Mr. Chairman.

The CHAIRMAN. If you would proceed, Dr. Jones?

STATEMENT OF SIDNEY L. JONES, NOMINEE FOR ASSISTANT SECRETARY OF THE TREASURY

Dr. JONES. Mr. Chairman and Senator Packwood and distinguished members of the committee, I do have the honor of being nominated to be the Assistant Secretary of the Treasury for Economic Policy. It is an honor for me to appear before this committee. I realize, as the Chairman indicated, this is an extraordinarily busy time.

I see my function at the Treasury as four-fold. The most important one is to advise the Secretary on what I think will happen in the economy. That has to be a very personal view. It has to be given to him directly and without the screen that is sometimes created.

The second function is the Troika II forecasting activity, where we prepare economic forecasts at least twice each year underlying the budget of the Executive Office and also as a guide for our internal planning. These forecasts can be very important, as a signal to the economy, and in planning for the budget and other purposes.

I say the third most important function is to serve the Secretary in his role as the Chairman of the Economic Policy Council. Here, the change in the economy has led to many more micro types of problems, problems involving energy, the environment, trade, types of policies that, as you said earlier, 15 years ago this particular person purse would not have been that much involved in. But in today's world we do a lot more microeconomics.

And the fourth function is to represent the Treasury with various external groups. Particularly at a time like this, it is important for the Treasury to speak and indicate the balance and strength of the economy and the stability of economic policies so that there are not misrepresentations of what is happening.

I have had 29 years as a professor at various universities. This is my eighth presidential nomination, including the Federal Reserve Board. I hope that I am qualified. It is a privilege to serve in the government in general and particularly Treasury. And I will serve to the best of my ability if confirmed.

The CHAIRMAN. Thank you. Dr. Jones, when we saw that fall in the market on Friday, we heard all kinds of commentary as to what caused it. Do you think any particular government policy caused that sell-off Friday?

Dr. JONES. I think the situation on Friday, somewhat different than the one in October 1987, was a convergence of very specific events, an arbitrage in between the futures market in Chicago, what was happening in New York, the very technical disparity, the elimination of the bank financing underneath the buyout of the United Airlines, but the economic information which appeared on Friday was really quite helpful. The retail sales were solid. They

were not ebullient enough to cause great concern, but they were solid enough to indicate the economy continues.

The Producer Price Index was of great concern, but was somewhat predictable because of the past behavior of oil prices running down in the summer months, before beginning to rise in subsequent times.

I think that it was important for the Treasury, the Federal Reserve Board, the Council of Economic Advisers, the Securities and Exchange Commission to communicate, to exchange strategies, and to indicate that policies would be stable. But it seems to me that in the day's volume and in the day's level of the stock markets, this is not a function that the government can intervene with very effectively.

The CHAIRMAN. The story is that the Administration and the Federal Reserve are at odds over which is the more dangerous, high interest rates or inflation. Do you think high interest rates are detrimental to the economy, and are crimping investment? Do you have any thoughts on that?

Dr. JONES. Well, one would always prefer low interest rates to high interest rates as a matter of definition, but it has to be judged in the context of the economy.

I think the Federal Reserve Board had a very difficult call to make about a year ago. They were concerned about the capacity level of plants and equipment in use. They were concerned that we might be approaching an ignition point on the employment figures, the unemployment rate. I think it is extremely important that the Federal Reserve Board in their independent status be able to make such a call. They somewhat dampened the growth of the money supply and, as the economy became clear as to what was happening, I think correctly made some adjustments in May and June and July, which hopefully will not result in further deterioration of the economy.

So I think the answer to your question is we would always prefer to have lower interest rates, but there are times when for overall economic policies, you have to compromise and adjust to the current time period.

The CHAIRMAN. Do you think that getting a bipartisan agreement on a clean reconciliation bill with the House and the Administration would have a better effect on the financial markets than if we went to sequestration? I was on one of the talk shows on Sunday, and I listened to Mr. Darman say that maybe we just ought to go ahead with sequestration, that that was perhaps a more forthright approach. Which do you think would have the better effect on the financial markets of this country?

Dr. JONES. Well, I can only give you the advice of an economist, not of an Administration leader. But it seems to me that for good government purposes, we should continue to make progress on the Gramm-Rudman-Hollings targets and that the reconciliation bill for 1990 would be a very strong move in reassuring the markets that we take those targets seriously and that we have a meaningful program to achieve them.

I think in the strategies, as they unfold, there might be a sense of frustration in which you might comment that perhaps it would be better to go ahead with sequestration. I think in the main, the

financial markets look to government to make priority decisions and to make such judgments, and I think they would prefer to see the reconciliation bill move forward.

The CHAIRMAN. Well, Sunday, I also heard some of the fellows on that news program debating whether or not we are going to have a recession this year. Do you want to make a comment on that?

Dr. JONES. Well, I come from a profession which has predicted recession every single January beginning in 1983. So our credibility is not too high. My own view is that the moderate growth that we have seen since the middle of 1984 will continue. We think that the early third quarter figures probably indicate that we have remained in the 2½-percent zone, which has been approximately the growth rate of the second quarter, has been representative of the last 5 years.

My personal view is that my economist friends have ignored the two key variables in the economy in their continued gloom and doom forecasts. First, the fact that we have 80 million people who were born between 1946 and 1964. They comprise, in their 30's now, a very solid foundation on the purchasing side or the consumption side, and they make up the bulk of the prime labor force. So that is the key variable in the economy in my mind, and that will continue in the near term.

The second key variable is the emergence of an integrated world economy in which countries such as Spain or Thailand or members of the Asean nations, which were not major players a decade ago, are now meaningful markets. As you know, 40 percent of our exports go to developing countries. And so I think that what we have here is an underlying stability in the economy, which is unique to the 1980's and the 1990's, of this baby boom consumption pressure and a growing international economy.

I think American companies have been underestimated in their viability and their competitive position. They are beginning to come back. Our wage rates have been stable in the 1980's. We are no longer the high-cost nation around the world. We have been pleasantly surprised with the export performance. We are beginning to get more information on the services.

So in my mind, the answer is yes. I think we can continue with moderate economic growth for the foreseeable future, which I would categorize as probably through 1990 at least.

The CHAIRMAN. Thank you. My time has expired. On the order of arrival, Senator Chafee is next.

Senator CHAFEE. Thank you, Mr. Chairman. Dr. Jones, I was encouraged, obviously, by your report. And I particularly was interested in your comment that you did not feel that we were out-pricing ourselves in the wage point of view and that we are no longer the highest cost producers. It does not seem that way in the automobile industry, and I do not know whether the automobile industry amounts to a significant portion of the total picture which you portrayed. Do you have any comments on the automobile industry situation?

Dr. JONES. If you take the entire automotive sector, it is about one out of seven employees. This is motor transport and sales and distribution. However, if you take the number of automobile workers themselves, they are no longer a dominating factor in the labor

force. Union membership, which would be very important in that sector, is down to about 16 million people. And so what has happened in many of our basic industries where we have had good productivity results—we have had good productivity in the manufacturing sector during the 1980's, when we have had almost no productivity in the entire economy.

So, certainly, my reference earlier was to average U.S. wage rates, where we would rank probably fourth now. Germany, Sweden, Canada would have an average higher wage rate. There are certain industries with higher wage rates, and certainly the automobile industry would be one of them. The Hyundai automobile plant pays \$2.31 an hour for their labor force.

Senator CHAFEE. What is the Hyundai?

Dr. JONES. The Hyundai Co. in Korea.

Senator CHAFEE. In Korea.

Dr. JONES. Would be \$2.31 an hour. Ours would obviously be considerably higher than that. I think what this really means is that while we, on average, are no longer the highest cost producer, we are certainly not the lowest cost producer. We would still be at the high end of the zone. And what that really means is that if you want to maintain the standards of living which we now have, you have to do it through more through productivity. Productivity is the way that you can offset some of those higher wages.

Senator CHAFEE. Could you just briefly comment on the entire percentage of manufacturing workers in the United States and whether you see, if not the number decline, the percentage of the workforce decline represented by manufacturing workers and whether that gives you cause for concern?

Dr. JONES. Well, if you went back to, say, 1960, probably about 27 percent of the labor force would have been in manufacturing. If you took that similar head count today, it would probably be 17 or 18 percent. In some ways that could be counted as a negative, and it certainly would be negative if America had not created 25 million jobs during the current cyclical expansion. What has happened here is that as the number of steel or number of automobile or number of chemical workers has been reduced over time, the total share of manufacturing has not declined in the overall gross national product. And that has been achieved because the workers who remain in those industries are more productive.

We had a very similar situation in agriculture. If one went back 20, 40, 50 years ago, we had approximately 30 percent of the labor force in agriculture. Today that is two percent. So with 2 percent of our labor force, we can produce enough food literally to feed two Americas. Now, in one sense, that can be counted as a negative in that fewer people are working in agriculture. But, on the other hand, it is a very strong factor in that we are still productive in agriculture, that we can maintain our output with fewer numbers of workers.

So my own impression is the crucial thing is our share of manufacturing in our overall economic activity has not declined. What has declined is the number of workers as they have become more productive and we have made capital investments in those sectors.

Senator CHAFEE. I want to thank you, Mr. Chairman. Thank you, Dr. Jones.

The CHAIRMAN. Senator Packwood?

Senator PACKWOOD. No questions, Mr. Chairman.

The CHAIRMAN. Senator Rockefeller?

Senator ROCKEFELLER. I have no questions, Mr. Chairman.

The CHAIRMAN. Senator Pryor?

Senator PRYOR. Do we have a shortage of time, Mr. Chairman?

The CHAIRMAN. No, no. You are in good shape.

Senator PRYOR. Well, I just have one or two. I was looking at your distinguished record, Dr. Jones, and I see all the publications that you have been involved with. I was very impressed with the broad scope of the matter which you have written about. I look here in March 1979. Your "Assessment of the U.S. Economy: The Role of Foreign Banks," that was 10 years ago. What was your conclusion 10 years ago, and would it differ today?

Dr. JONES. I think the conclusion 10 years ago was that we should offer a national treatment and that they were relatively minor players in our economy. My conclusion today would be much different. They now amount to about 20 percent of the commercial bank loans that are being made in the North American market. So they are obviously very major players in our commercial lending activities.

Even more important, given the structure of our banking system, as you know, there are about 14,000 commercial banks. In most countries, they have a handful of banks and they have nationwide branching. And so what is happening here, I believe, is that many of the largest banks, the 10 largest banks, today are Japanese. The rest are, say, French or German or Dutch or British or Australian, Canadian. So when one sees some of the really multinational activities that are going on, you really have to depend more on consortium or groups of banks to undertake these.

Our very largest banks are still major players. But it seems to me that we are going to have to consider in the future: If we are going to maintain our leadership in the multinational economy, we are going to have to make some structural adjustments in how large and how geographically diversified our banks can become in order to remain competitive.

Senator PRYOR. Are you suggesting we curtail their involvement in our country by curtailing the number of foreign banks?

Dr. JONES. No. I do not think that is ever the route to go. I think we continue to want to give national treatment. I think that the United States is the world's leading trading and investment country, which it is by far, always benefits the most when we have an open trade and investment position. So I would want to strengthen our banking system rather than preclude foreign financial institutions coming here.

Senator PRYOR. Do many of these countries allow our banks to do what we have allowed them to do here?

Dr. JONES. Not in every case, but this is certainly Treasury's position, requesting this and pursuing it. But the answer is no, they do not always give national treatment.

Senator PRYOR. What about Japan? Do they allow our banks to operate there in Japan?

Dr. JONES. Our banks can operate there, but they have different kinds of regulations and rules. And our involvement there has been rather minor compared with the size of their economy.

Senator PRYOR. If nothing is done, how far will this influence reach in the influence of the role of foreign banks? It is growing, I assume. It is not being minimized. In fact, it is on the other end of the scale. Are we doing anything to look at this structural change that is happening before our eyes right now?

Dr. JONES. I think that there is considerable structure activity going on in the Senate Banking Committee. I think Senator Riegle has this as one of the four or five major projects that he wants to take a look at.

Within the Treasury Department, the Assistant Secretary Mullins for Domestic Finance, would, frankly, be more involved with the banking structure than I would be, and I am not that familiar with what our proposals are.

Senator PRYOR. I just picked that article of 10 years ago, and I just wanted to see what you were saying then and what you might say now. Thank you.

Dr. JONES. Well, as often, we were not quite as right as we thought we were at the time.

Senator PRYOR. Thank you, Mr. Chairman.

The CHAIRMAN. Are there further questions?

Senator CHAFEE. Mr. Chairman, could I just ask one quick question?

The CHAIRMAN. Yes, of course.

Senator CHAFEE. If we brought down the deficit, would it bring down interest rates?

Dr. JONES. I have long believed that if the financial market could see a meaningful and credible sustained reduction of the Federal budget deficit, this would have a positive impact on interest rates.

Senator CHAFEE. And that would bring down the cost of capital in the United States?

Dr. JONES. Yes. It would bring down the cost of capital in the United States.

More importantly, it would make the international economy more viable and more dynamic. And since increasingly in the 1990's our economic activities are going to be export-oriented, I think it would improve our export markets in the developing countries, where, as I said earlier, we send about 40 percent of our exports.

Senator CHAFEE. Thank you. Thank you, Mr. Chairman.

The CHAIRMAN. Dr. Jones, once again, I think you are eminently qualified for the job, and I am delighted to see you coming back into government service. I think we are fortunate to have you.

We will stand in recess. And hopefully we will get another four members for a quorum. We are meeting again at 4 o'clock, as you know, but we will not adjourn. We will stand in recess.

And thank you very much. I hope we can report you out this afternoon, if not very soon.

Dr. JONES. Thank you.

The CHAIRMAN. Thank you.

[Whereupon, at 3:31 p.m., the hearing was concluded.]

APPENDIX

PREPARED STATEMENT OF SIDNEY L. JONES

MR. CHAIRMAN, SENATOR PACKWOOD, DISTINGUISHED MEMBERS OF THE FINANCE COMMITTEE, I HAVE THE HONOR OF BEING NOMINATED BY THE PRESIDENT FOR THE POSITION OF ASSISTANT SECRETARY OF THE TREASURY FOR ECONOMIC POLICY. IT IS ALSO AN HONOR FOR ME TO APPEAR BEFORE THIS COMMITTEE. I APPRECIATE YOUR MAKING THE TIME IN YOUR BUSY SCHEDULES TO HOLD THIS HEARING.

THE OFFICE OF THE ASSISTANT SECRETARY OF ECONOMIC POLICY HAS A NUMBER OF IMPORTANT FUNCTIONS INCLUDING: DEVELOPING AND MAINTAINING AN ECONOMIC RESEARCH CAPABILITY; ADVISING AND MAKING RECOMMENDATIONS TO THE SECRETARY REGARDING TREASURY POLICIES AND OTHER ISSUES OF ECONOMIC IMPORTANCE; CONDUCTING RESEARCH IN AREAS OF IMPORTANCE TO THE CURRENT STATE AND FUTURE COURSE OF THE UNITED STATES ECONOMY AND ANALYZING AND EVALUATING THE ECONOMIC CONSEQUENCES OF DEVELOPMENTS OF ALTERNATIVE POLICIES AND LEGISLATIVE PROPOSALS.

THE ASSISTANT SECRETARY ALSO WORKS WITH THE SECRETARY IN HIS ROLE AS CHAIRMAN OF THE ECONOMIC POLICY COUNCIL AND WITH THE OFFICE OF MANAGEMENT AND BUDGET AND THE COUNCIL OF ECONOMIC ADVISERS AS A PART OF THE TROIKA FORECASTING GROUP. THE TROIKA IS RESPONSIBLE FOR DEVELOPING THE ADMINISTRATION'S OFFICIAL ECONOMIC FORECASTS.

I AM PLEASED, THAT IF CONFIRMED, THIS WILL BE THE EIGHTH TIME IN MY CAREER THAT I WILL HAVE HAD THE OPPORTUNITY TO WORK IN THE FEDERAL GOVERNMENT. I HAVE SPENT THE LAST TWENTY-NINE YEARS OF MY CAREER AS A PROFESSOR TEACHING FINANCE AND ECONOMICS AT A NUMBER OF UNIVERSITIES AND WORKING FOR THE FEDERAL GOVERNMENT IN VARIOUS POSITIONS. AS THE CHAIRMAN KNOWS, I AM NOT NEW TO THE DEPARTMENT OF THE TREASURY. IN 1974 I HELD THIS POSITION IN THE NIXON ADMINISTRATION. I BELIEVE THAT MY EXPERIENCE IN BOTH THE PRIVATE AND PUBLIC SECTOR WILL ALLOW ME TO BRING TO THIS POSITION THE HISTORICAL PERSPECTIVE AND ANALYTICAL EXPERTISE NEEDED TO PROVIDE THE PRESIDENT AND THE SECRETARY WITH THE APPROPRIATE INFORMATION AND RECOMMENDATIONS.

BEFORE CLOSING, MR. CHAIRMAN, I WOULD LIKE TO TAKE THE OPPORTUNITY TO THANK PRESIDENT BUSH AND SECRETARY OF THE TREASURY BRADY FOR THE CONFIDENCE THEY HAVE EXPRESSED IN ME BY NOMINATING ME TO THIS POSITION. I CAN PROMISE THAT I WILL DO MY UTMOST TO SERVE MY COUNTRY DURING MY TENURE WITH THE DEPARTMENT OF THE TREASURY. I HOPE THAT THE COMMITTEE WILL BE ABLE TO SHARE THE CONFIDENCE EXPRESSED BY THE PRESIDENT AND THE SECRETARY OF THE TREASURY.

THANK YOU.

COMMUNICATIONS

United States
Office of Government Ethics

P O Box 14108
Washington, D C 20044

AUG 29 1989

The Honorable Lloyd Bentsen
Chairman
Committee on Finance
United States Senate
Washington, D.C. 20510

Dear Mr. Chairman:

In accordance with the Ethics in Government Act of 1978, I enclose a copy of the financial disclosure report filed by Sidney L. Jones, who has been nominated by President Bush for the position of Assistant Secretary for Economic Policy of the Department of the Treasury.

The report has been reviewed and advice obtained from the Treasury Department concerning any possible conflict in light of the Department's functions and the nominee's proposed duties. Enclosed for your review is a copy of a letter dated August 11, 1989, from the Designated Agency Ethics Official of the Department, Jeanne S. Archibald, which outlines the steps that will be taken to ensure that no conflicts arise. If confirmed, Mr. Jones has agreed to recuse himself from participating in any particular matter which may have a direct and predictable effect upon his financial interests including the Marriott Corporation, Hewlett Corporation, Crown Life Insurance Company and Sit New Beginnings Fund.

Based on the foregoing, we believe that Mr. Jones will be in compliance with applicable laws and regulations governing conflicts of interest.

Sincerely,

Frank Q. Nebeker
Frank Q. Nebeker
Director
