1. Lower all tax rates to a flat 25%
2. Deductions must be continued for home mortgages, charities and medical care.Otherwise you will severely hurt charitable donations and their resulting community work.
3. A VAT/Consumption tax should be implemented as is used in every other civilized country in the world. This type of tax is a very fair method of taxation as the rich spend more and will therefore pay the greater share of these taxes. AND- tourists, who now pay ZERO consumption tax other than a state sales tax, will likewise contribute to the national revenue.
4. A tax on Marijuana just as there is on cigarettes. This could be a terrific revenue source.
5. The tax exemption for municipal financing must be continued. Otherwise, you will GROSSLY drive up the cost of financing for municipalities, hospitals, water and sewer improvements, road way financing, etc. Municipalities can not borrow at the same cost as the US Treasury can. Therefore, this exemption must be continued as it currently exists in order to permit municipalities to finance at the lowest possible cost.
